# Faith Giedrycz

IT Intern @ Victaulic | Student IT Specialist @ Penn State | B.S. IT &  
Application Development  
Bucks County, Pennsylvania, United States

## Summary

An undergraduate student at Penn State University pursuing a B.S. in Information Technology with a focus in application development. Whether inside or outside the classroom, I strive to create real-world impacts for people that bring technology and community together.

I'm passionate about software development and data. I currently work as a Student IT Support Specialist, applying my technical skills to a real-world environment. I'm also a Penn State Lion Ambassador and Orientation Leader, leading new student transition and engagement.

I'm an incoming IT Intern at Victaulic this summer, where I will support business intelligence and data-centric projects, while also gaining exposure to scripting, automation, and cloud-based data platforms!

On the side, I'm a licensed amateur radio operator! My proudest radio accomplishments include being in the cover feature of QST magazine and speaking live with NASA astronaut Stephen Bowen, who was aboard the International Space Station (ISS), via radio technology.
